

## Series spec sheet

# RMTB

## TRITIUM SIGN

Power Free - No AC

Suitable for Hazardous Applications/Locations

15 year Lifespan

The Stanpro RMTB series of self-luminous running man signs provide reliable signage for applications where typical signs cannot be employed. The RMTB series are completely non-electrical so they can be installed in any location, including glass entranceways/ vestibules, greenhouses and outdoor applications. This also insures that the RMTB signs are non-sparking, making them ideal for explosion-proof locations. RMTB signs are not governed by the requirements of the C860 standard due to the non-electrical design of the light source.

## FEATURES AND SPECIFICATIONS

### • Light source

- 15 year expected life
- The tubes are lined with phosphor which glows green in color
- The light output is unaffected by extremes temperature or moisture
- Continuously illuminate at performance specifications for the rated duration
- Minimum initial brightness at time of manufacture of 0.15 foot lambert. Brightness variation between letters does not exceed a ration of 3 to 2

### • Mechanical

- Tritium signs are supplied standard with a white, low profile thermoplastic frame
- The frame secures the thermoplastic face and stencil and allows for simple wall mounting
- Bracket for ceiling mounting included
- The tritium is sealed within several silicate tubes fitted into the ABS thermoplastic housing
- The light source requires no maintenance or service throughout the lifespan of the sign
- Temperature from -30°C to +65°C

### • Compliances

- Running Man Multipurpose signs are compliant to the CAN/ULC-S572 standard
