

T8 - TYPE A+B 5 CCT Selectable

The LED T8 Standard 5 CCT Selectable Type A+B lamps offer a versatile retrofit solution for replacing T8 fluorescent lamps. They provide two flexible installation methods: operating with the existing fluorescent ballast (Type A) or bypassing the ballast and wiring directly to line voltage (Type B).

■ Color Selectable

A versatile LED tube solution that allows you to switch between 5 color temperatures (3 000/3 500/4 000/5 000/6 500 K), making it suitable for a wide range of projects and applications. It's the perfect choice for simplifying inventory management.

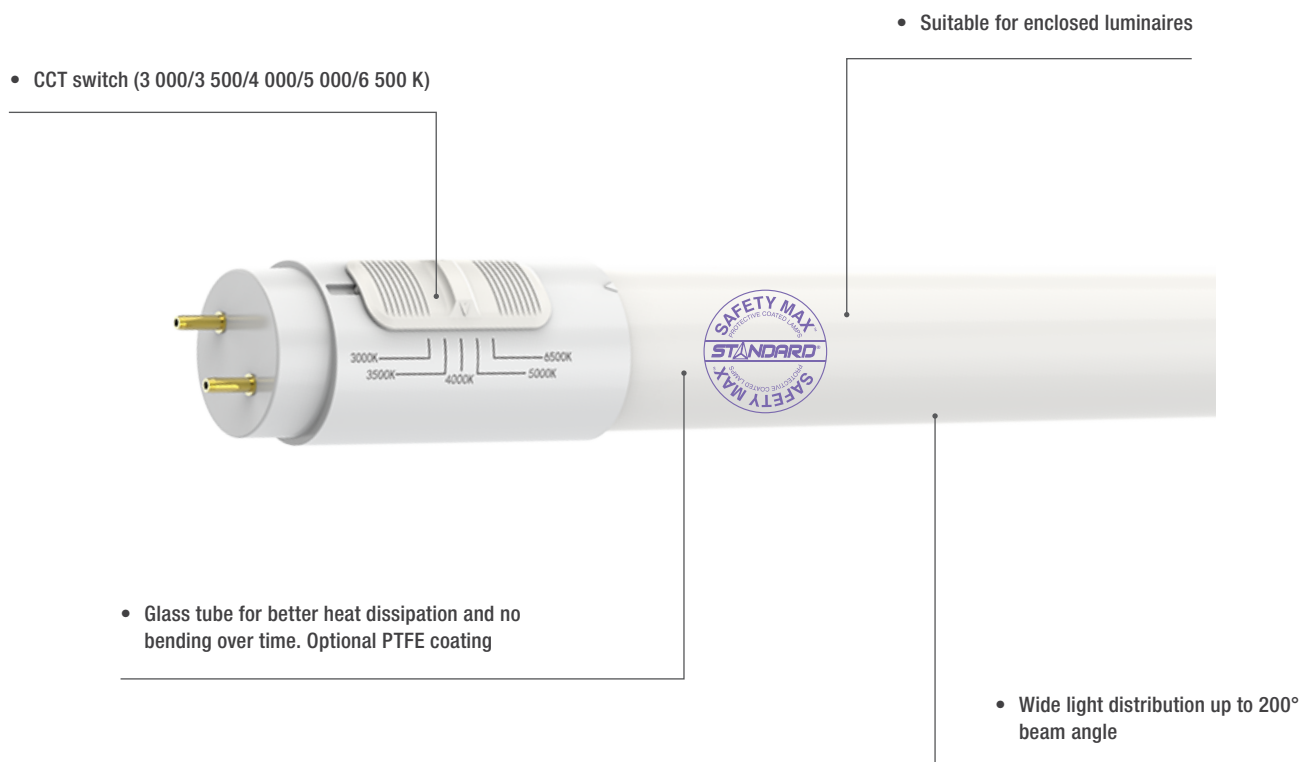

■ Full range

Offered in three lengths (2', 3', and 4'), Stanpro provides a complete selection of color-selectable LED T8 A+B lamps, making it the ideal choice for your next project or bulk order.

■ Safety Max™ and NSF

It is also available with an optional PTFE coating that contains broken glass, making it shatter-resistant and NSF certified. Standard's Safety Max™ coating is the ideal solution for commercial kitchens, art galleries, museums, and schools.

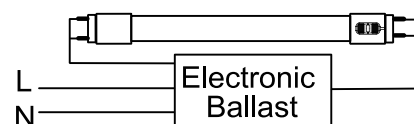

Features

Compatible with a wide range of ballasts under type A installations.

Standard's LED T8 lamps are compatible with a variety of 120-277V and 347V instant start, rapid start and program start ballast. They can also be dimmable depending on the ballast inside the existing fluorescent luminaire.

Consult our ballast compatibility list for more details and a list of ballasts.

Electronic Compatible(Type A)

Summary Specification Table

Order code	Description	Watts	Volts	Color temp.				Lumen ouput	CRI	Life	Case qty	
		(W)	(V)	(K)				(lm)		(hours)	(master)
