

## Series Spec Sheet

# VT2-L GEN 2

## 2' LED VAPOR TIGHT With Made To Order Options Optional Emergency Remote

A luminaire ideal for a variety of indoor/outdoor industrial and commercial applications. Intended for environments where moisture and/or dust may be present. Ideal for garages and stairwell.

### FEATURES AND SPECIFICATIONS

#### • Applications<sup>1</sup>

- Industrial facilities
- Stairwells
- Parking garages
- Exterior retail areas
- Transportation
- Pedestrian tunnels

#### • Construction

##### Housing

- Lightweight, flexible, durable and sealed polycarbonate construction
- Integral gasket forms uniform, long-life seal around the entire enclosure
- Reinforced polycarbonate latches
- Sealed strain relief/cable gland kit included
- Power connection is easily accomplished through pre-drilled hole on one end of the housing. Wet location gland is included to seal the fixture from moisture.

##### Lens

The UV stabilized polycarbonate lens with LED diffusing pigment is impervious to rust or rot and is unaffected by extreme temperatures

#### • Specifications

- Easy to clean and service
- LED technology for long term energy savings

##### Driver

- 120 V, 120 V-277 V and 347 V
- 0-10V dimming driver (down to 1%). Dimming cables sold separately, see ordering guide
- 2.5 kV surge protection (standard). See options table for additional surge protection

##### Operating Temperature

-40°C to +40°C (-40°F to 104°F)  
DL: 0°C to +25°C (32° to 77°F)  
LINK: -40°C to +40°C (-40°F to 104°F)

##### Lens

- Stainless steel surface mounting hardware for wall/ceiling included with the luminaire
- Set of 2 V-hooks also included for suspended mounting. Consult ordering guide for more options

##### Mounting

Stainless steel surface mounting hardware for wall/ceiling included with the luminaire. Set of 2 v-hooks also included for suspended mounting. Consult ordering guide for more options.

#### • Optional Emergency Lighting

##### LINK Normally ON LED Vapor Tight Luminaire

- Consuming 11 W, 12-24 VDC
- 200 mA constant current
- Delivers 1 193 to 1 367 lumens in emergency mode
- Ease of maintenance when used with Stanpro emergency lighting battery units complete with auto test function
- Complements Stanpro's Normally ON LED Vapor Tight family
- Patent pending

Please view the LINK specification section for more details on this technology

#### • Emergency Lighting Compliances

- Complies to CSA C22.2 #141-15 (When use with DL, EL option)
- Meets ICES-005 requirements

#### • Compliances

- Suitable for damp & wet locations
- IP65
- 1 500 PSI: High pressure hose down test (1.3 gallon per minute for 3 minutes at 1.5-2.0' from the unit) to maintain the integrity of the fixture. No water ingress is allowed
- Meets requirements of ICES-005 for class A products
- cETL
- DLC Premium, DLC Standard
- BC Hydro

<sup>1</sup> Aviation cable length based on selected power cable length.

<sup>2</sup> To see available options, please consult the occupancy sensors section.

<sup>3</sup> Contact factory for availability.

<sup>4</sup> DL option is not compatible with OS (internal).

<sup>5</sup> DIM1 option must select L6 or L10. DL option is not compatible with DIM1.

<sup>6</sup> DIM2 option is not compatible with OS (internal).

<sup>7</sup> 1 tamper proof bit (HAR06-TPBIT-UDR) included per order. Please consult the accessory table to order additional quantities.

<sup>8</sup> See Mounting Options table.

<sup>9</sup> Luminaire includes 1 end hole with wet location gland for main power connection. The /EH option offers a second end hole with wet location gland on the opposite side of the luminaire.

<sup>10</sup> Use plug (included with the luminaire) to block End Hole, if not in use.

<sup>11</sup> 90 CRI option may decrease lumen output from 15% to 19% depending on CCT.

<sup>12</sup> The LINK Emergency Power conversion module is compatible with all the following all configurations: LS1B, LS2B. Not compatible with the following options: DL, EH, OS (external), RMP-05, RMP-075. When in Emergency Mode, luminaire only consumes 11W.

<sup>13</sup> When selecting DL, RMP-05 and RMP-075 options, the fixture maintains wet location status, however IP rating is no longer applicable.

**For Emergency Lighting spacing, please see p.5.**

## NORMALLY ON EMERGENCY REMOTE LUMINAIRE

This luminaire can be used with an emergency backup powered by either a 12 V or 24 V DC Stanpro battery unit, complete with or without auto test.

### NORMAL MODE

### EMERGENCY MODE

### TYPICAL SPECIFICATION

Supply and install Stanpro LINK \_\_\_\_\_ ft, LED vapor tight, Model number: \_\_\_\_\_ remote normally ON emergency luminaire, CSA C22.2 141-15 certified and meet the requirements prescribed by ICES-005. Normally ON when AC is present and when connected to a Stanpro battery unit complete with or without auto test, the luminaire shall act as an emergency lighting remote and consume 11 W of DC power in \_\_\_\_\_ V producing 2 924 - 3 146 lumens in emergency mode.

The remote normally ON emergency luminaire shall be powered by a Stanpro emergency lighting battery unit as described herein and shown on the drawings. The Stanpro auto diagnostic micro-controller board shall supply the rated load for a minimum of a 1/2 hour to 87.5% of the rated battery voltage. The unit shall be rated 120 V, 277 V or 347 V, 60 Hz and be CSA listed. The unit shall have an output of: \_\_\_V and \_\_\_W. The charge voltage factory set to  $\pm 1\%$  tolerance. High efficiency, rapid recovery, precision control charging system shall be employed to promote long battery life and reduce the potential for grid corrosion. The charger shall provide a continuous high charge to recharge the battery, when the battery is at full capacity, the charger will shut-off. Periodically the charger shall provide a pulse of energy to keep the battery topped off. The pulse charger shall be precisely regulated and shall charge the battery in relation to its temperature, state or charge and input voltage fluctuations. The charger shall be current limited, temperature compensated, short-circuit proof and reverse polarity protected. The unit shall be furnished with an electronic lockout circuit, which will connect the battery when the AC circuit is activated, and an electronic brownout circuit, which will activate the emergency lights when utility power dips below 75% of nominal voltage. A low voltage battery protection circuit shall be provided and will disconnect the load when the battery reaches the end of discharge.

The automated testing performed by the Stanpro auto test system has been designed to comply with all of the requirements of the National Fire Code. Every month, a 5 minute discharge and diagnostic test checks the operational status of the unit. Every 12 months, this test is extended to the full 30 minute, code required duration. This ensures that the battery charger is recharging the battery in accordance with code requirements.

The unit shall be Stanpro model: SL\_ \_\_\_\_\_

Data is based upon tests performed in a controlled environment. Actual performance can vary depending on operating conditions.  
All products are subject to change or may be discontinued any time without notice.
